

## Program #3

### CISC 3130

#### Description

- Implement a tree with an arbitrary number of children (i.e., not binary).
- Write a method `serialize`, which writes the tree to a text file, and `deserialize`, which reads a tree from a text file.
- Implement the other methods required by `main`.
- Test your tree with `main`.

#### Submission

In Blackboard, submit

- Your `Ntree.h`
- Any other related files.

Make sure your code has your name in a comment at the beginning of each file.
